NYU | STERN

RESEARCH PROFESSIONAL

We are looking for highly skilled and motivated individuals to work as full-time research professionals for a period of at least one year. The start date is subject to negotiation, but may be as early as July 1, 2020.

This position is ideal for recent college graduates with an interest in economics research who are planning to attend graduate school in economics, finance, or a related field. You will work with and be supervised by NYU Stern Professors **Toomas Laarits, Cecilia Parlatore, and Olivier Wang** on projects of theirs and their coauthors. We plan to hire two research professionals matched to professors based on skills and interest. For one of the positions, preference will be given to candidates with strong quantitative backgrounds or prior experience with statistical software such as Stata, R, or Python because many of the projects will involve extensive work with large datasets. For the other position, we are looking for more theoretically oriented applicants who want to combine exposure to theoretical modeling with learning of numerical methods within Economics applications.

Ideal candidates will:

(i) have a strong quantitative or analytic background;
(ii) have strong computer skills including programming;
(iii) be self-driven and able to work independently to solve problems;
(iv) have a long-term interest in pursuing research in economics, finance or a related field.

Background in economics is a plus, but not necessary—we welcome all candidates with strong technical backgrounds.

The position will be based in New York City, and the successful candidate will be able to participate in the academic life at NYU, including the ability to attend research seminars and PhD courses. NYU Stern provides equal employment opportunities to all employees, applicants and job seekers. We offer a competitive salary and can sponsor a visa for foreign nationals.

To apply, please fill out this online survey, which contains additional information about the desired skills and research interests for each hiring professor:
